About me

Since I was a child, my passion has been drawing and animation. That led me to be a Graphic Designer and develop mainly in the world of Advertising. Thanks to a mixture of curiosity and work, I have learned the infinity of possibilities that movement can bring in the Audiovisual area. **This conviction led me to enter the magical world of 3D Character Animation, always with the aim of sharing positive messages, good values and deep ideas to inspire the young and old.** The path traveled has given me great satisfaction, joining wonderful teams, and being part of ever-growing projects, proposing to achieve new goals every day with which to grow on a personal and professional level.
